Yet, i can hear every background noise So I thought I would apply a gate effect to counter that but there is non in my list of audio effects.. Si i got myself the Focusrite 2i2 and Ableton Live 10 Lite came with it Now, i got my mic connected and gain basically as low as possible on the 2i2.. Ableton's Scale is a very useful MIDI effect that lets the user constrain or "lock" every note of a MIDI phrase from the keyboard or controller to a certain music scale or key.

May 14, 2018 Aside from that, i can now verify if i run just Live 9, or Live 10 it will see the effects/instruments etc.. So my questions are: 1 does the light version not ship with it?2 how can i create / install a gate to get rid of the background noise?Thank you very much for your help! Greetings.
